

Cro-nel®

Cold Seal (Self-Sealing) Packaging Materials Protecting your products in Transit

Cro-nel is a versatile packaging material made from a combination of paper and foam with a cohesive coating on the foam side. Using Cro-nel, you can create a secure envelope or product protection just by pressing the two pieces of cohesive material together. Gone are the days of needing supplementary closures such as staples, glue or heat. Cut Cro-nel to any size you need -- saving money with custom-sizing.

Packages are lightweight, cushioned, watertight and tamper-evident, providing maximum product protection at the lowest cost.

| | Cro-nel Light Duty | Cro-nel Medium Duty | Cro-nel Heavy Duty |
|----------------------|------------------------------------|---|--|
| Construction: | Paper & Foam | Paper & Foam | Linerboard & Foam |
| Backing: | 30 lb. Kraft Paper | 57 lb Kraft Paper | 42 lb Linerboard |
| Foam: | 1/16" Polypropylene | 1/16" Polypropylene | 1/16" Polypropylene |
| Laminating Adhesive: | Modified Acrylic | Modified Acrylic | Modified Acrylic |
| Cohesive: | Blended Natural Rubber Latex-B | Blended Natural Rubber Latex-B | Blended Natural Rubber Latex-B |

Cro-nel® Plus

Cold Seal (Self-Sealing) Packaging Materials Protecting Your Products in Transit

Use **Cro-nel Plus** when your products need strong and flexible packaging material. Cro-nel Plus features a cohesive film/foam construction and adds polypropylene film for extra protection. With Cro-nel Plus you create secure product protection just by pressing the two pieces of cohesive material together.

Custom applications range from large commercial light posts, playground equipment, pharmaceuticals and furniture to sharp items such as cutting blades.
